

Digital Wallet – Prioritized Test Cases

Test cases are prioritized by business risk, financial impact, regulatory compliance, and customer trust, focusing validation effort on the highest-risk scenarios first rather than exhaustively testing every possible combination.

TC ID	Priority	Test Scenario	Preconditions	Test Steps	Expected Result
TC-001	P0	Tier 1 transfer below per-transaction limit	Tier 1 account with sufficient balance	1. Login 2. Initiate wallet transfer of ₦19,999 3. Submit	Transfer succeeds and balance updates correctly.
TC-002	P0	Tier 1 transfer exactly at per-transaction limit	Tier 1 account	Transfer ₦20,000	Transfer succeeds.
TC-003	P0	Tier 1 transfer above per-transaction limit	Tier 1 account	Transfer ₦20,001	Transfer is rejected with appropriate limit exceeded message.
TC-004	P0	Tier 2 transfer exactly at per-transaction limit	Tier 2 account	Transfer ₦200,000	Transfer succeeds.
TC-005	P0	Tier 2 transfer above per-transaction limit	Tier 2 account	Transfer ₦200,001	Transfer is rejected.
TC-006	P0	Tier 3 unlimited per-transaction transfer	Tier 3 account with sufficient balance	Initiate transfer exceeding Tier 2 limit	Transfer is not blocked by per-transaction limit (subject to available balance and other validations).
TC-007	P0	Tier 1 daily limit accumulation	Tier 1 account with no transfers today	Perform transfers totaling exactly ₦50,000	All transfers succeed until daily limit is reached.
TC-008	P0	Tier 1 daily limit exceeded	Tier 1 account with ₦50,000 already transferred today	Attempt additional transfer	Transfer is rejected due to daily limit exceeded.
TC-009	P0	Concurrent transfers against remaining daily limit	Tier 1 account with only ₦20,000 remaining daily allowance	Submit two ₦20,000 transfers simultaneously	Only one transfer succeeds; the other is rejected. Daily limit is never exceeded.
TC-010	P0	Daily limit reset at midnight	User has exhausted daily limit	Attempt transfer immediately after daily reset	Daily usage resets correctly and transfer is processed if within new day's limit.
TC-011	P0	Failed transfer should not consume daily limit	Tier 1 account	Attempt transfer that fails due to downstream error	Daily limit remains unchanged.

TC ID	Priority	Test Scenario	Preconditions	Test Steps	Expected Result
TC-012	P0	Successful reversal restores consumed limit (subject to business rule confirmation)	Successful transfer exists	Reverse the transaction	Daily limit is adjusted according to agreed business rule.
TC-013	P1	Transfer to own linked bank account	Verified linked bank account exists	Transfer amount exceeding normal limit to own linked account	Behaviour matches approved exemption rule; only genuine linked accounts receive exemption.
TC-014	P1	Attempt to bypass exemption using non-linked account	Another user's bank account	Transfer using non-linked account	Exemption is denied and normal transfer limits apply.
TC-015	P1	Immediate Tier 1 → Tier 2 upgrade after KYC	Tier 1 user completes KYC	Complete KYC then immediately attempt ₹100,000 transfer	New Tier 2 limits apply immediately (or according to specified business rule).
TC-016	P1	Transfer initiated during tier upgrade	Tier upgrade in progress	Start transfer while KYC status changes	System behaves consistently according to defined business rule; no inconsistent limit validation occurs.
TC-017	P2	Scheduled transfer executes within available daily limit	Scheduled transfer exists	Schedule transfer for future execution	Transfer executes successfully if sufficient daily limit remains at execution time.
TC-018	P2	Scheduled transfer fails when daily limit is exhausted	Scheduled transfer exists	Exhaust daily limit before scheduled execution time	Scheduled transfer fails gracefully with appropriate notification or retry behaviour as specified.
TC-019	P2	Correct error message for limit exceeded	User exceeds transaction limit	Submit transfer above permitted limit	User receives clear, accurate error message identifying the applicable limit.
TC-020	P2	Audit trail for limit validation	Audit logging enabled	Complete successful and rejected transfers	System records tier, transfer amount, limit evaluated, decision, timestamp, and transaction outcome for audit purposes.

Priority Key: **P0** Critical / must-pass before release **P1** High / important secondary risk **P2** Medium / lower-impact edge cases
